All flammability specifications and all corresponding data refer to typical performance in the specific test indicated and should not be construed to imply the behavior of those or any other material under actual fire conditions.

This information is offered for your general guidance only. It is accurate to the best of our knowledge at the time of printing, but is not intended to relieve the user from its responsibility to investigate and understand other pertinent sources of information and to comply with the laws and procedures applicable to the safe handling and use of this material.

## Care and Cleaning Instructions

**For Normal Cleaning:** In general, most common stains can be cleaned using warm, soapy water and clear water rinses. Moderate scrubbing with a medium bristle brush will help to loosen soiling material from the depressions of embossed surfaces.

**For Stubborn Stains:** Use Formula 409® commercially available mild detergent in accordance with manufacturers' instructions. Test cleaners in an inconspicuous area as cleaner manufacturers may change formulas without notice. Full strength rubbing alcohol or mineral spirits may be tried cautiously as a last resort on very stubborn stains, if the above suggestions do not work. Indiscriminate use of any solvent or solvent containing cleaner can severely damage or discolor vinyls.
