

Marine Fabrics

Superior longevity and stability

REcacril® Marine fabric is made from solution dyed acrylic fiber, which gives REcacril® exceptional fade resistance and allows us to extend a 10-year limited warranty, even in the most demanding marine environments.

Our proprietary **Infinity Process** produces the most dimensionally stable acrylic fabric in the market.

This stability is critical to your marine canvas work looking and fitting great the day it is installed and long afterwards.

10 year warranty.

Tightly woven.

Solution dyed acrylic.

Great to cut and sew.

Superior Dimensional Stability.

Warranty

Because S.A. Recasens' fabrics are manufactured with only the highest-quality raw materials and the most rigorous quality-assurance procedures, we offer a 10-year warranty on our 100% solution dyed acrylic products.

The warranty protects against the loss of characteristics, rot, mildew and discoloration typical in normal atmospheric conditions. This warranty does not apply against deterioration of any kind due to abusive use, accidental burns, negligence, vandalism, perforations, natural disasters or acts of nature. Normal wear, weather soiling, or stains from environmental pollution or other sources are not covered.

The product must be properly installed and maintained. The warranty, if applicable, does not cover labor, frames, systems and installation supplied by the dealer.

Infinity Process

The Recacril® and Recsystem canvases are treated with a special technological process to ensure the lasting quality of the fabric. In this process, nanoparticles completely cover the surface of the fibers in the fabric, forming a permanent coat. After treatment, both the surface and the inside of the fabric are permanently protected against dirt build-up, and adverse effects of a wide variety of atmospheric agents.

The low reactivity and high stability of the Infinity treatment endows long-term protection to the awning, especially against mildew, and provides excellent water and oil repellence.

Care and Cleaning

Proper care and cleaning should be taken to ensure the life of Recacril® outdoor fabrics.

For regular care and maintenance, the excess dirt should be brushed from the fabric using a soft brush; the fabric should then be sprayed with warm water (not exceeding 100° F) and air-dried.

Periodically, the fabric should undergo a more thorough cleaning. Again, brush fabric with a soft bristled brush, spray with warm water, then apply a gentle soap. Let stand for 10 to 20 minutes taking care not to let it dry, then rinse thoroughly and air-dry. Do not use detergents and/or solvents.

Make sure to leave the retractable awning outside until it is completely dried. This prevents mildew from forming.
